The 23.8% is based on a federal tax statutory rate of 21.0% and a combined state income tax rate net of federal benefits of 2.8%. The 27.0% is based on a federal tax statutory rate of 21.0% and a combined state income tax rate net of federal benefits of 6.0%.

**Adjusted EBITDA** is our primary internal measure of profitability. We believe Adjusted EBITDA is useful to investors because it enables them to better evaluate the performance of our core business across reporting periods. Adjusted EBITDA represents net income excluding (a) interest expense on our outstanding debt, (b) income tax expense, (c) depreciation and amortization expense, (d) equity-based compensation expense, (e) other non-operating income and (f) certain other significant items that we believe are not indicative of core performance.

**Fee Related Earnings ("FRE")** is used to highlight earnings from recurring management fees. FRE represents net income excluding (a) incentive fees and related compensation, (b) interest income and expense, (c) income tax expense, (d) equity in income of investees, (e) other non-operating income and (f) certain other significant items that we believe are not indicative of our core performance. We believe FRE is useful to investors because it provides additional insight into the operating profitability of our business. FRE is presented before income taxes.

**Non-GAAP earnings per share** measures our per-share earnings excluding certain significant items that we believe are not indicative of our core performance and assuming all Class B and Class C units in HLA were exchanged for Class A common stock in HLI. Non-GAAP earnings per share is calculated as adjusted net income divided by adjusted shares outstanding. **Adjusted net income** is income before taxes fully taxed at our estimated statutory tax rate. We believe Non-GAAP earnings per share is useful to investors because it enables them to better evaluate per-share operating performance across reporting periods.

Our **assets under management ("AUM")** comprise primarily the assets associated with our customized separate accounts and specialized funds. We classify assets as AUM if we have full discretion over the investment decisions in an account. We calculate our AUM as the sum of:

- (1) the net asset value of our clients' and funds' underlying investments;
- (2) the unfunded commitments to our clients' and funds' underlying investments, and;
- (3) the amounts authorized for us to invest on behalf of our clients and fund investors but not committed to an underlying investment.

Management fee revenue is based on a variety of factors and is not linearly correlated with AUM. However, we believe AUM is a useful metric for assessing the relative size and scope of our asset management business.

Our **assets under advisement ("AUA")** comprise assets from clients for which we do not have full discretion to make investments in their account. We generally earn revenue on a fixed fee basis on our AUA client accounts for services including asset allocation, strategic planning, development of investment policies and guidelines, screening and recommending investments, legal negotiations, monitoring and reporting on investments and investment manager review and due diligence. Advisory fees vary by client based on the amount of annual commitments, services provided and other factors. Since we earn annual fixed fees from the majority of our AUA clients, the growth in AUA from existing accounts does not have a material impact on our revenues. However, we view AUA growth as a meaningful benefit in terms of the amount of data we are able to collect and the degree of influence we have with fund managers.

**Fee-earning assets under management (Fee-earning "AUM" or "FEAUM")** is a metric we use to measure the assets from which we earn management fees. Our fee-earning AUM comprise assets in our customized separate accounts and specialized funds from which we derive management fees. We classify customized separate account revenue as management fees if the client is charged an asset-based fee, which includes the majority of our discretionary AUM accounts but also includes certain non-discretionary AUA accounts. Our fee-earning AUM is equal to the amount of capital commitments, net invested capital and net asset value of our customized separate accounts and specialized funds depending on the fee terms. Substantially all of our customized separate accounts and specialized funds earn fees based on commitments or net invested capital, which are not affected by market appreciation or depreciation. Therefore, revenues and fee-earning AUM are not significantly affected by changes in market value. Our calculations of fee-earning AUM may differ from the calculations of other asset managers, and as a result, this measure may not be comparable to similar measures presented by other asset managers. Our definition of fee-earning AUM is not based on any definition that is set forth in the agreements governing the customized separate accounts or specialized funds that we manage.
